

ByteBack

Unified AI Inbox for Cold Outreach Teams

Product Manual & Demo Guide

Version 1.0 • July 2026

1. ByteBack kya hai?

ByteBack ek unified inbox aur AI CRM hai jo cold outreach teams ke liye bana hai. Aap apne saare mailboxes (Gmail, Outlook, Instantly, custom SMTP) ek jagah connect karte ho, aur AI har reply ko auto-classify, prioritize aur follow-up tasks me convert kar deta hai — taaki koi hot lead miss na ho.

One-line pitch

"Reply aata hai → AI padhta hai → sahi bucket me daalta hai → task ban jaata hai → lead pipeline me move ho jaata hai. Aap sirf important cheezein reply karte ho."

Kis ke liye bana hai

- Cold outreach agencies jo daily 500+ replies handle karti hain
- SDR / BDR teams jinke paas 3-10 mailboxes hain
- Founders jo apna outbound khud chalte hain aur inbox chaos se thak gaye hain

2. Complete Feature List

Feature	Kya karta hai
Unified Inbox	Saare mailboxes ke replies ek hi thread view me. AI category chips (Interested, Meeting, Objection, Not Now, OOO, Unsubscribe, Spam) ke saath.
AI Classification	Lovable AI Gateway se har reply ka category + sentiment + intent nikaalta hai. Confidence score bhi dikhata hai.
Auto Follow-up Tasks	Reply category ke basis pe automatically due-date aur priority ke saath task ban jaata hai. Meeting = 1 din, Interested = 1-2 din, Objection = 2 din, Not Now = 14 din.
Lead Scoring	Har lead ka score reply behaviour, opens, aur AI sentiment se calculate hota hai.
Pipeline (Kanban)	Custom stages banao (New, Contacted, Qualified, Meeting, Won, Lost). Drag-and-drop se leads move karo.
CRM view	Har lead ka full timeline — emails, tasks, notes, stage changes — ek jagah.
Tasks module	Sab AI-generated aur manual tasks. Overdue > 2 hours = auto-escalation notification.
Analytics dashboard	Reply rate, meeting rate, category breakdown, per-mailbox performance.
Team & Workspaces	Multi-user workspaces with roles: Owner, Admin, Member, Viewer. Email invites.
Notifications	In-app bell + email digest. Preferences per-user configurable.
Daily AI Digest	Har subah 8 AM email — kal ke replies ka summary + aaj ke priority tasks.
Integrations	Instantly (2-way sync), Google Sheets (export), Webhooks (Zapier/Make), Resend (transactional email).
Mobile app	Capacitor-based iOS + Android build. Offline banner, push-ready.
Onboarding wizard	5-step guided setup: workspace → team → mailboxes → business type → done.

3. Screen-by-Screen Tour

3.1 Sign up / Sign in

1. Home page pe "Get Started" ya "Sign In" click karo.
2. Email + password ya Google se sign in.
3. Pehli baar login pe onboarding wizard start hota hai.

Google auth is pre-configured via Lovable Cloud broker.

3.2 Onboarding (5 steps)

4. Workspace name aur slug daalo.
5. Team members ko email se invite karo (skip kar sakte ho).
6. Mailbox connect karo — Gmail / Outlook / Instantly / SMTP.
7. Business type choose karo (SaaS, Agency, IT Company, etc.) — AI iska use tone tune karne me karta hai.
8. "Enter ByteBack" — dashboard load ho jaata hai.

3.3 Dashboard (/app)

- Aaj ke unread replies ka count
- Overdue tasks alert
- AI Insight panel — 3 top actionable leads
- Quick links to Inbox, Pipeline, Tasks

3.4 Inbox (/app/inbox)

- Left: mailbox + category filters
- Middle: thread list with AI category chips
- Right: full thread + AI suggestion + "Create task" button

3.5 Pipeline (/app/pipeline)

- Kanban board with custom stages
- Drag lead card between stages → auto-logs timeline event
- Click lead → CRM detail drawer

3.6 Tasks (/app/tasks)

- Filter: due today / overdue / this week / all
- Priority chips: high / med / low
- Tick → done. Overdue > 2h → escalation notification

3.7 CRM (/app/crm)

- Searchable lead list with score
- Timeline: emails, tasks, stage changes, notes

3.8 Analytics (/app/analytics)

- Reply rate, meeting-booked rate
- Category distribution donut
- Per-mailbox performance table

3.9 Team (/app/team)

- Members list with roles
- Invite by email, revoke access

3.10 Integrations (/app/integrations)

- Instantly API key connect
- Google Sheets export destination
- Webhook URLs (Zapier / Make)

3.11 Notifications (/app/notifications)

- In-app bell (top-right)
- Per-user preferences: which events, email digest on/off

4. Demo Script (5 minutes)

Minute 0–1: The Problem

"Cold outreach me sabse bada pain — replies aate hain 5 mailboxes me, 300 din me, aur 80% low-intent hain. Aap important 20% miss kar dete ho."

Minute 1–2: Onboarding

Fresh account banao, wizard chalao, workspace + 1 mailbox connect karo. 90 seconds me user "in" hota hai.

Minute 2–3: Unified Inbox

Inbox kholo, dikhaao: 40 replies, AI ne 6 "Interested", 3 "Meeting", 12 "Objection", 15 "Not Now", 4 "OOO" me classify kiye. Sirf top 9 pe focus.

Minute 3–4: Auto Tasks + Pipeline

"Meeting" reply pe click → task automatically kal ke liye ban gaya. Lead card ko Kanban me "Qualified" → "Meeting" me drag karo.

Minute 4–5: Analytics + Daily Digest

Analytics tab — reply rate, meeting rate. Fir bataao "kal subah 8 AM aapko email milega — pura summary + aaj ke 5 priority tasks."

Closing line

"ByteBack aapke 3 SDRs ka kaam 1 SDR + AI se karvata hai — bina ek bhi hot lead miss kiye."

5. Tech Stack (for the curious)

Feature	Kya karta hai
Frontend	React 19 + TanStack Start v1 (SSR), Tailwind CSS v4, shadcn/ui, Framer Motion
Backend	TanStack server functions on Cloudflare Workers (edge)
Database + Auth	Lovable Cloud (managed Postgres) with Row Level Security
AI	Lovable AI Gateway (classification, summarization, digest generation)
Email	Resend for transactional, Instantly for outbound sync
Cron jobs	pg_cron → /api/public/cron.daily-digest & /api/public/cron.escalate
Mobile	Capacitor (iOS + Android wrap of the web app)

Security

- Row Level Security on every table, scoped to workspace membership
- Roles stored in separate user_roles table (no privilege escalation risk)
- Webhooks signed with HMAC-SHA256
- Service role key never exposed to client bundle

6. FAQ

Q. Kitne mailboxes connect kar sakte hain?

Koi hard limit nahi — practically 20+ smoothly handle karta hai.

Q. AI kaunsa model use hota hai?

Lovable AI Gateway — default Gemini 2.5 Flash (fast + free tier), heavy tasks pe GPT-5 fallback.

Q. Data kaha store hota hai?

Lovable Cloud (managed Postgres). Aap kabhi bhi Cloud → Advanced settings → Export data se full CSV export le sakte ho.

Q. Kya offline chalega?

Mobile app me offline banner + queued actions hain. Web par read-only cached view.

Q. Pricing?

Currently invite-only beta. Pricing tiers TBD.

Support

Team ke liye: workspace ke Team page se roles manage karo. Bug reports: notifications bell → "Report issue" (coming soon) ya email support.
